CREATIVE PROFILE

My work sits at the intersection of motion, design and communication. I am strongest when a project requires both visual craft and structured thinking - shaping an idea, building a clear visual system, and carrying it through animation or video with attention to rhythm, hierarchy and audience.

SELECTED STRENGTHS

Concept to execution

Able to develop a creative direction and carry it through production rather than treating design and motion as separate stages.

Motion-led storytelling

Experienced in using pacing, transitions, typography and animation to make communication more engaging and easier to understand.

Cross-disciplinary production

Comfortable moving between 2D/3D animation, video editing, advertising content, AR/VR and educational media.

Mentorship

Experienced in teaching and supervising final-year student work while providing practical creative and technical feedback.
